*A SAMPLE SURVEY OF 'PROGRESSIVE' FARMERS  
CONDUCTED IN DELHI DURING THE WORLD  
AGRICULTURE FAIR: DECEMBER 1959,  
JANUARY AND FEBRUARY, 1960*

*Conducted by*

THE INDIAN INSTITUTE OF PUBLIC OPINION LTD.,  
NEW DELHI

## REPORT ON A SURVEY OF "PROGRESSIVE" FARMERS

In the month of December 1959, the Community Development Ministry entrusted the Indian Institute of Public opinion with a survey of "Progressive" farmers visiting the World Agriculture Fair under the Ministry's sponsorship. The purpose of the survey was to obtain an image in the minds of these farmers of the working of the community development projects in their areas; an attempt was also to be made to assess the extent to which current performance was different from the expectations raised or changes desired. In other words, the project was on the one hand, a factual assessment in the minds of participants, and, on the other hand, it was to be a guide to policy in terms of the people on the spot who naturally have the greatest opportunity for contributing to its further development. The impact of the Fair on the farmers in terms of their capacity to absorb new ideas was also relevant to the programme.

It is believed that all the objects of the survey have been amply fulfilled. Indeed, it is quite remarkable, considering the smallness of the sample, which was only 500, how accurately even local factors have been reflected in the replies received. A simple illustration will show how the Exhibition attracted local interest in a natural, yet biased, way. Thus in West Bengal fisheries were of special interest, while in Himachal Pradesh potato cultivation occupies first place; to Uttar Pradesh farmers tube-wells were a major factor, as in fact they are in current irrigation there, in the Punjab fruit growing and so on. In many other respects the total picture is so much of one piece that one cannot doubt that this presents as nearly as may be, an accurate reflection of the minds of these central elements in the process of rural change.

### The Sample

The sample consisted of 500 interviews drawn in a random manner from 20,000 invitees, subject only to the condition that the number of interviewees chosen from a particular State was proportionate to the cropped area of that State. In the result the sample emerged as follows:

State	Actual	Percentage
Punjab .. .. .	28	5.6
Rajasthan .. .. .	25	5.0
Uttar Pradesh .. .. .	94	18.8
Bihar .. .. .	66	13.2
West Bengal .. .. .	35	7.0
Assam .. .. .	21	4.2
Orissa .. .. .	32	6.4
Madhya Pradesh .. .. .	41	8.2
Bombay .. .. .	54	10.8
Andhra Pradesh .. .. .	36	7.2
Madras .. .. .	30	6.0
Mysore .. .. .	27	5.4
Kerala .. .. .	11	2.2
<b>TOTAL ..</b>	<b>500</b>	<b>100.0</b>

## The Sampling Error

The sampling error which attaches to small samples drawn from small universes is a subject of considerable controversy. Had it been a very large universe a sample of 500 would carry a much significant percentage error. But one might hazard the opinion that figures given in the tables attached are significant if differentials are greater than 5 percentage points.

One particular caution must be exercised in dealing with this sample. While it is representative enough of the invitees, it is not, and should never be treated, as a random sample of all persons in community blocks. This is brought out clearly in the structure of the sample as it emerges both in its education and income components, and from the average land holding. It is interesting to note that 23·4 per cent were in the 100—200 income group, 19 per cent in 201—300 income group, 7·8 per cent were graduates, and the average holding might be deemed to be five to six times that of the average Indian holding.

## The Size and Direction of the Community Development Impact

One of the most significant results of the report has been that documentation in many ways of the largeness and many-sided impact which the Community Development projects have recorded. Detailed figures will be found in the numerous tables that are attached, but for the current purpose only a few significant figures are selected; for example, as many as 68·8 per cent of the respondents are "satisfied" with the progress of the projects. Again, in numerous directions, there is illustration of the wide range of impact in areas which in the urban public mind seem under-estimated; for **EXAMPLE, THE BELIEF THAT THESE AGRICULTURISTS SHOULD NECESSARILY BE DOMINATED BY AN AGRICULTURAL SLANT HAS BEEN SHOWN TO BE UNFOUNDED.** Thus, in the general sample answer to the question "How do you describe Community Development Work? What does it mean to you?" The highest percentage (24·6) has gone to "Improving the standard of living of the villagers through Education, Sanitation, Road Construction, etc., the second highest figure (13 per cent) "to promote schemes for social welfare with participation of villagers;" improved methods of agriculture obtained 12·6 per cent. It might be mentioned that the coordination of activities of Government agencies to ensure rural uplift comes next with 10 per cent. If one examines details under each of the heads, one obtains a picture of a very large impact in areas, such as a desire for education and literacy and matters connected therewith; 29·2 per cent were conscious of the emphasis placed on schools and 8·8 per cent on mobile libraries. A large percentage—20·2—asked that "libraries and information centres" should receive greater priority in the future. In projects which received the active cooperation of the people construction of primary school building with 13·2 per cent ranked next only to construction of approach roads with 34·8 per cent in their favour.

It is unnecessary to enter here into many of the details, but one might point out that there is a quite remarkable appreciation of the effectiveness of Shramdan (voluntary labour) as an element in the community development projects reflected in particular in the road building. All in all, one should stress the point that the approach of these progressive farmers is not primarily agricultural. Their minds are being broadened to develop a climate in which agricultural development has an important place, but in which their total development—particularly education and the use of other facilities h as health, sanitation, and cooperation—has a vital place.

## The Agricultural Content

There is a paradoxical approach towards the agricultural content of the community projects. On the one hand, as has already been illustrated, agriculture does not occupy a dominant place in a many-sided impact, in which the general reason of the standard of living, health, sanitation and education compete with it for dominant interest. On the other hand, particular studies of the agricultural content will show how remarkably embedded in the respondents minds are the numerous factors which go into agricultural development and the very wide interest which attaches to particular factors such as irrigation, improved methods of cultivation, seeds, fertilisers and so on. Thus, in one form or another, irrigation appealed to all except to about 65 of those interviewed, and it is remarkable how small irrigation works such as "sinking wells" (19.4 per cent) and tubewells and boring-wells (12 per cent) have attracted detailed interest. Similarly, 15.6 per cent were interested in the Japanese method of cultivation and, in regard to improved seeds, 42.8 per cent were interested in wheat and 35.2 in paddy, 10.9 in cotton.

There is, as the tables will show a local element in these cases, but the fact that only 24.6 per cent gave a "don't know" answer implies that improved seeds are catching on in a biggish way. Similarly, in regard to fertilisers all except 31 per cent seem to be conscious of the use of fertilisers under the community development programme at the moment; 64.6 use ammonium sulphate and as many as 50.8 per cent super-phosphate, 24 per cent claim to use urea and 10.6 per cent "mixtures." These figures are, of course, for multiple use, since more than one fertilizer is used at the same time. The high super-phosphate and "mixture" and urea uses are particularly significant.

It might be noted amongst other things that these farmers welcome demonstrations held on compost and farm yard manuring, which was 36.6 per cent.

The practice of animal husbandry and poultry farming is disappointing with 78.6 per cent not expressing any opinion on animal husbandry and an even high percentage on poultry farming (27.2 per cent).

## Village Industries

One of the significant results of this survey has been to highlight the almost insignificant place played by village industries in the minds of these farmers. It will be seen that in the total sample only 1.8 per cent have been effected by the Ambar Charkha and even for weaving and spinning the figure is only 2.6 per cent. 16.4 per cent do claim to be engaged in village industries and 55 per cent said there is considerable scope for expansion of industries. One must assume therefore that a some latent interest has been unfulfilled. Most of the current interest is in existing industries, with no display for new initiatives. It has been shown that one of the big factors acting against the development of industries in the area is the absence of finance. This seems to be the major bottleneck. In 114 of the 275 respondents to this question the absence of credit facilities were blamed for lack of development. Others asked for technical help and training (represented by 25.1 per cent of this number). The other factors in order of importance are new machinery goods and marketing facilities (6.2 per cent).

## The World Agriculture Fair

The purpose of the World Agriculture Fair was to contribute as an element in education in these farmers and it is naturally important to determine the extent to which this purpose was fulfilled. A very large number of tables show the impact made on different farmers by stalls notably those of the U.S.A., the U.S.S.R., China and so on. The U.S.A. stall seems to have had a very substantial effect, so far as total impression is concerned but one might argue that, in matters of current application, the People's Republic of China with simpler methods has left as deep an impression.

The extent to which exhibits in State stalls have attracted interest seems to suggest that purely Indian exhibitions directed Statewise to these products might have an even greater impact than a dramatic, but widely dispersed, exhibition of improved methods in other areas which cannot be of immediate application in a particular State.

There is enough in the general answers to suggest that absorption of whole exhibition was not possible in the time at the disposal of these farmers, and, indeed, as many as 21.6 per cent stated that it was more entertainment than education. This is at once an indication of the frankness of these farmers who responded to questions.

All in all, one might argue that the picture here revealed is one of substantial value in assessing present policy as well as in framing new directions of change.

ONE VITAL FACTOR WHICH NEEDS TO BE IMPRESSED ON ALL URBAN COMMENTATORS, INCLUDING THE NEWSPAPERS, IS THE EXTRAORDINARY EXTENT TO WHICH EVALUATION REPORTS PRODUCED BY ACADEMIC AND BIASED SOPHISTICATED URBAN COMMENTATORS DIFFERS FROM THE STRAIGHTFORWARD EVALUATION OF MEN WHO HAVE PARTICIPATED IN THE PROGRAMME AT ALL STAGES. INDEED, ONE OF THE MOST IMPORTANT SUGGESTIONS WE SHOULD MAKE ON THIS REPORT IS THE SUGGESTION THAT EVALUATION OF RURAL PROJECTS BY TOWNS-PEOPLE CONTAINS A FAR GREATER BIAS THAN CAN POSSIBLY ARISE FROM THE BIAS OF USING PERSONS ENGAGED IN THEIR OWN WORK. There is something to be said for a traffic of ideas between policy-makers and these progressive farmers, but almost nothing can be gained from our accepting an outside review on what in fact is happening in the community development areas.

THE PREDOMINANT IMPRESSION CREATED BY THIS SURVEY IS THAT A MAJOR MENTAL TRANSFORMATION IS TAKING PLACE, WHICH MIGHT SERVE AS A BASIS OF SOCIAL RECONSTRUCTION IN WHICH THE TECHNOLOGICAL CHANGES REQUIRED BY INDIAN AGRICULTURE CAN FIND MORE FERTILE GROUND.

## COMMUNITY DEVELOPMENT

Q. 1. How do you describe "Community Development work"?  
What does it mean to you ?

	Actual	Percentage
To create consciousness about the plan .. .. .	47	9.4
To co-ordinate activities of all Government agencies to ensure rural uplift .. .. .	50	10.0
Understanding the problems of villagers to make execution realistic .. .. .	49	9.8
To promote schemes for social welfare with participation of villagers .. .. .	65	13.0
Canvassing improved methods of agriculture .. .. .	63	12.6
Improving the standard of living of the villagers through education, sanitation, road construction etc. .. .. .	123	24.6
Rural uplift through co-operative efforts .. .. .	25	5.0
Unable to specify, cannot say .. .. .	78	15.6
<b>TOTAL ..</b>	<b>500</b>	<b>100.0</b>

Q. 2. Kindly give brief and precise details of the work done under the Community Development Programme in your village.

### *Land Improvement*

Reclamation of fallow-land .. .. .	31	6.2

## Q. 3. What Project/B.D./NES officers mostly do to enlist people's cooperation in the community development programmes?

They give/arrange demonstrations .. .. .	98	19.6
Conduct group discussions .. .. .	15	3.0
Address Meetings .. .. .	228	45.6
Supply information through booklets, pamphlets and posters etc. .. .. .	1	0.2
Arrange film shows .. .. .	2	0.4
Experiments are carried on the farms by village level workers .. .. .	43	8.6
Conduct discussions through Panchayats .. .. .	53	10.6
Rabi and Kharif camps (two to seven days) and cattle show organised .. .. .	7	1.4
Can't say or don't know .. .. .	53	10.6
<b>TOTAL ..</b>	<b>500</b>	<b>100.0</b>

\*No check : provision of multiple answers.

Q. 4. Which particular programme undertaken in your area received the greatest active cooperation of the people?

	Actual	Percentage
Construction of drains and lavatories .. .. .	7	1.4
Digging of wells, tanks and tube wells .. .. .	34	6.8
Construction of approach (Kacha) roads .. .. .	174	34.8
Construction of Primary School buildings .. .. .	66	13.2
Construction of community hall and Panchayat Ghars ..	20	4.0
Construction of canals, bunds and bridges .. .. .	14	2.8
Organisation of classes on co-operative basis and village leaders .. .. .	2	0.4
Maternity, child welfare and mahila-samaj training centres	10	2.0
Construction of compost pits .. .. .	8	1.6
Building for veterinary and cattle health centres .. ..	2	0.4
Cattle sheds and cattle breeding centres .. .. .	1	0.2
Gramsewak and village leaders annual and half yearly camps	13	2.6
Establishment of cooperative societies and construction of buildings for the same .. .. .	3	0.6
Libraries and reading rooms and recreation centres ..	11	2.2
Agricultural loans for improved implements, seeds and fertilizers .. .. .	12	2.4
Electrification of the village .. .. .	1	0.2
Village cleanliness campaign .. .. .	5	1.0
Fishery—construction and repair of fish ponds .. ..	2	0.4
Introduction and demonstration of improved methods of cultivation of paddy, wheat and sugar cane .. .. .	7	1.4
Others .. .. .	9	1.8
Can't say .. .. .	99	19.8
<b>TOTAL ..</b>	<b>500</b>	<b>100.0</b>

Q. 5. Did active cooperation of the people in this project/projects take the form of :

Monetary contribution .. .. .	51	10.2
Donation of labour under Shramdan .. .. .	288	57.6
Both .. .. .	77	15.4
Donation of land for approach roads .. .. .	5	1.0
Donation of good seeds .. .. .	1	0.2
Can't say or don't know .. .. .	78	15.6
<b>TOTAL ..</b>	<b>500</b>	<b>100.0</b>

On the whole were you satisfied with the results achieved?

	Actual	Percentage
Satisfied .. .. .	344	68.8
Dissatisfied .. .. .	65	13.0
Unable to specify .. .. .	3	0.6
Can't say .. .. .	88	17.6
<b>TOTAL ..</b>	<b>500</b>	<b>100.0</b>

If dissatisfied is it because :

People should have co-operated more .. .. .	14	21.5
B.D.O. personnel should have participated more actively ..	23	35.5
Money could have been spent judiciously .. .. .	10	15.4
Should have taken less time .. .. .	1	1.5
Block Development officials are corrupt and careless ..	6	9.2
Need for practical demonstration .. .. .	2	3.1
Poor farmers and backward area being neglected .. .. .	1	1.5
Lack of social consciousness in the people .. .. .	2	3.1
Can't say .. .. .	6	9.2
<b>TOTAL ..</b>	<b>65</b>	<b>100.0</b>

Q. 6 Kindly describe the spheres of community development project work wherein you have taken an active part.
